

Silicon carbide composite  
radiant tubes

Hydrogen Fluoride (HF)  
and CVD (Chemical  
Vapor Deposition)  
systems, retort furnaces

Cryogenic processing equipment, CryoTemper -300F to 550F  
and CryoFurnace -300F to 1200F, Nitrogen storage and  
delivery systems, guillotine doors, swing doors, chest-type and  
custom designs.

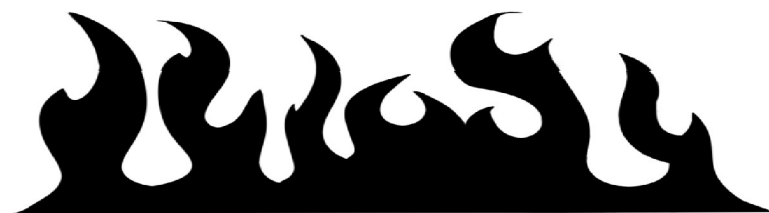

South-Tek Systems uses safe, reliable PSA and Membrane  
Technology to create Nitrogen and Oxygen gas separation in their  
Nitrogen Generators.

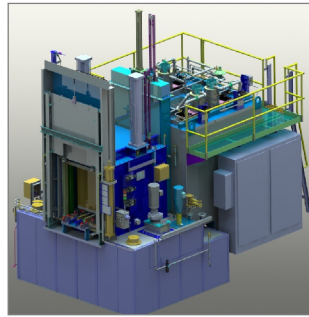

P.O. Box 7170  
211 Industrial Avenue  
Granbury, TX 76049  
817-326-5125

Atmosphere heat treating furnaces including batch, continuous and production cells. Also offering spare parts, custom fabrication, expert service and support

Vacuum heat treating and brazing furnaces, parts and service.

Vacuum pump rebuilds, exchanges and service.

Carbon probes, furnace controls, dewpoint & IR Gas Analyzers, control upgrades and retrofits

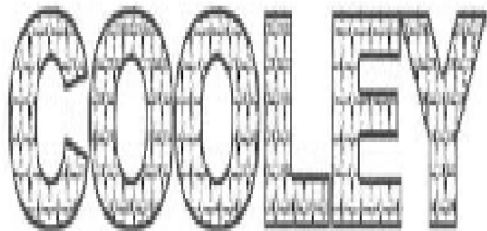

Low and high temperature laboratory and production furnaces, split tube furnaces, vacuum formed ceramic fiber heaters, cast heaters, heater coils, air heaters, ovens, kilns and diffusion heaters, all custom designed

Water cooling systems for thermal processing, including water towers, pumps, heat exchangers & controls

Cast heat treating fixtures and furnace components

Welded rod baskets, fixtures & liners

Carbon Fiber Composite (CFC) furnace components and fixtures
